The Iridium account holder pays for the satellite portion at a cost as stated above. ▪ RUDICS - an enhanced data service that utilizes circuit switching technology via a dial-up modem and ISDN for low-bandwidth data transfer, enabling a host of applications to originate and terminate numerous connections simultaneously. Please allow 5 days to complete the process. ▪ All SIMs in the DSG need to be on the same Plan. ▪ A DSG can be created once there are 5 active connections. If the number of SIMs drops below 5 at any time, the monthly charge will be for the equivalent of the minimum (5 SIMs). However, the Allowance will be based on the actual number of SIMs multiplied by the Monthly Allowance per SIM. Overage will apply once the allowance has been consumed. ▪ Addition and removal of SIMs in a DSG can only take place at the start of a billing period (month). ▪ Services activated mid month will be billed as a standard plan and will be added to the DSG in line with the bill run. No ETF or new minimum period will apply. ▪ There is no rollover of unused allowance. ▪ The minimum term for a DSG is 12 months, the Early Termination Fee is equal to the Monthly Subscription multiplied by 5 (Minimum number of SIMs in the DSG). ▪ Each SIM card has the standard ETF SIM card rules, as per the Minimum Contract Period above. After the Minimum Contract Period is completed they can be moved in/out of the DSG with no penalty. ▪ A DSG can be upgraded.
